## **DETAILED ACTION**

### ***Election/Restrictions***

During a telephone conversation with Nicholas Masich on September 23, 2003 a provisional election was made with traverse to prosecute the invention of group I, claim 1. (Examiner Anita Alanko) Affirmation of this election must be made by applicant in replying to this Office action. Claims 2-3 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Claim Rejections - 35 USC § 112***

Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. It is not clear if applicant is disclosing a method of forming holes or a device that has laser pieced holes.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over DD 127358 (abstract).

DD (127358) discloses a nozzle plate (spinneret) in which laser piercing is used to form the holes. This nozzle is used to form glass fibers (filaments). DD (127358) does not teach the manufacture of synthetic filaments for the application to reduction of tread separation in tires.

It has been held that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to process of making, the intended use must result in a manipulative difference as compared to the prior art. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963). It would have been obvious to one of ordinary skill in the art at the time of the invention to use the nozzle to manufacture different types of filaments such as continuous synthetic filaments, because the extrusion nozzles (spinnerets) are functional equivalents.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 06210858 A (abstract).

JP (06210858 A) discloses an inkjet nozzle in which the holes are formed by laser piercing. The reference does not teach the manufacture of filaments or the relationship to tire treads.

It has been held that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to process of making, the intended use must result in a manipulative difference as compared to the prior art. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963). It would have been obvious to one of ordinary skill in the art at the time of the invention to use the nozzle to disperse different materials because the type of materials chosen are a choice in design and substitutions of known equivalent structures may be made. In re Kuhle, 188 USPQ (CCPA 1975) and In re Ruff, 118 USPQ 343 (CCPA 1958).
